

Trade Up Your
FTIR

Trade-Up Your FTIR Spectrometer from Shimadzu or any other vendors for Better Performance! Retiring our good IRAffinity FTIR Spectrometer, we have the ALL-NEW IRXross FTIR Spectrometer which have even better features which are guaranteed to increase productivity (through AI) and improve performance (better signal-to-noise ratio). **Upgrade NOW** and **enjoy 35% trade-up discount!**

Email enquiries to sgp@shimadzu.com.sg and quote **2022SGP0602-FTIR**

IRXross

Improved Performance

- 55,000:1 S/N Enables Ultra-High-Sensitivity Measurements
- 0.25 cm⁻¹ Resolution Enables High-Resolution Measurements
- Scan Speed: 40 mm/s

Built-in Analytical Intelligence

- IR Pilot as Standard Program
- Wide Variety of Libraries for Identification Testing and Contaminant Analysis

Regulatory Compliance

- Data Integrity with Solid Security
- Humidity-Resistant Window Material Compatible with the Wavenumber Measurement Range Specified in Pharmacopoeia
