

# Nutrient Analysis for Urban Farming Produce

Be equipped with knowledge and skills on how to extract nutrients from agri product, perform chemical and data analysis via a seamlessly laboratory informatics system.

Nutritional analysis is vital to ensure the yield of agriculture has optimal nutrient value. In this course, you will perform nutrient extraction, standards preparation and samples analysis using sophisticated analytical instruments such as liquid chromatography. You will also get to perform data analysis off-site made possible via a cloud-based system of analytical instruments.

## Course Fee

Singapore Citizens/Permanent Resident (SME-sponsored): S\$117.80

Singapore Citizen aged 40 and above: S\$117.80

Singapore Citizen aged 39 and below: S\$307.80

Permanent Resident: S\$307.80

Full Course Fee (with GST): S\$1026.00

## Course Dates

(2 days)

5 - 6 June 2024
